On behalf of the host institution, **Institut Català d'Oncologia (ICO)**, and the **European Palliative Care Research Centre (PRC)** at Oslo University Hospital, we are pleased to welcome you to the beautiful city of **Barcelona.**

This seminar provides a unique opportunity to exchange knowledge, foster collaboration, and explore innovative approaches in palliative care. Central to our discussions is the commitment to **patient-centred care**, ensuring that treatment strategies reflect the needs, values, and preferences of patients and families.

Equally important is the emphasis on **palliative care**, which remains a cornerstone of comprehensive cancer treatment and a critical factor in improving quality of life. Comprehensive Cancer Centres also play an important role in strengthening the capacity needed to advance integrated cancer care, research, and innovation. By integrating these principles and considering the broader role of digitalisation, we aim to advance research and clinical practice for the future.

We look forward to inspiring conversations, shared learning, and building stronger networks across Europe and beyond.

WELCOME TO BARCELONA!
